

Amendments to the Claims

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1 through 38. (Canceled)

39. (Currently amended) A method for presenting information relating to a deceased person, the method comprising:

- a) providing a life pack to a person associated with a deceased person, wherein the life pack comprises requests for particular types of biographical information relating to the deceased person;
- a)b) receiving biographical information relating to ~~[[a]]~~the deceased person, wherein the deceased person is associated with a cemetery, wherein the act of receiving biographical information relating to the deceased person comprises receiving responses to the requests for particular types of biographical information relating to the deceased person from the person associated with the deceased person in response to the act of providing the life pack;
- b)c) storing the biographical information relating to the deceased person in a computer readable medium;
- e)d) receiving a request for at least a portion of the biographical information relating to the deceased person, wherein the request is received from a user located within the cemetery, wherein the request is made by the user through a device operable to transmit the request from the user, wherein the device is located within the cemetery, wherein at least a portion of the request is received by a receiver, wherein the receiver is operable to receive requests for biographical information relating to a plurality of deceased persons; and
- d)e) transmitting at least a portion of the requested biographical information relating to the deceased person, wherein the transmitted biographical

information relating to the deceased person is transmitted from a transmitter located within the cemetery to the device located within the cemetery, wherein the transmitter is operable to transmit biographical information relating to a plurality of deceased persons, the device being further operable to present at least a portion of the transmitted biographical information to the user located within the cemetery.

40. (Previously presented) The method of claim 39, wherein the computer readable medium is located within the cemetery

41. (Previously presented) The method of claim 40, wherein computer readable medium is located within a cemetery office located within the cemetery.

42. (Previously presented) The method of claim 40, wherein the deceased person has a grave site located within the cemetery, wherein at least one of the computer readable medium or the transmitter is located at or proximate to the grave site.

43. (Previously presented) The method of claim 39, wherein the transmitter is located within a cemetery office located within the cemetery.

44. (Previously presented) The method of claim 39, wherein the computer readable medium further includes biographical information relating to a plurality of deceased persons.

45. (Previously presented) The method of claim 39, wherein the device comprises a portable electronic device.

46. (Previously presented) The method of claim 45, further comprising providing the portable electronic device to the user for a limited time.

47. (Previously presented) The method of claim 45, wherein the portable electronic device comprises at least one of a personal digital assistant or a laptop computer.

48. (Canceled)

49. (Currently amended) The method of claim 39, wherein the device comprises ~~[[a]]~~the kiosk located within the cemetery.

50. (Canceled)

51. (Previously presented) The method of claim 39, wherein the at least a portion of the requested biographical information relating to the deceased person is transmitted to the device wirelessly.

52. (Currently amended) A system for presenting information relating to a deceased person, the system comprising:

- a) a computer readable medium comprising data representing biographical information relating to a deceased person, wherein the deceased person is associated with a cemetery;
- b) a processor in communication with the computer readable medium, wherein the processor is operable to receive a request for at least a portion of the biographical information relating to the deceased person from a user located within the cemetery, wherein at least a portion of the request is received by a receiver in communication with the processor, wherein the receiver is operable to receive requests for biographical information relating to a plurality of deceased persons;
- c) a transmitter in communication with the processor, the transmitter being operable to transmit at least a portion of the requested biographical information relating to the deceased person, wherein the transmitter is located at a transmission location within the cemetery wherein the

transmitter is operable to transmit biographical information relating to a plurality of deceased persons;~~and~~

- c) a device operable to present at least a portion of the requested biographical information to the user located within the cemetery, wherein the transmitter is further operable to transmit at least a portion of the requested biographical information relating to the deceased person to the device in response to the request for at least a portion of the biographical information relating to the deceased person; and
- d) a kiosk located within the cemetery, wherein the kiosk comprises one or more of the computer readable medium, the processor, the receiver, or the transmitter.

53. (Previously presented) The system of claim 51, wherein computer readable medium is part of a computer system located within a cemetery office located within the cemetery.

54. (Previously presented) The system of claim 51, further comprising a grave site for the deceased person, wherein at least one of the computer readable medium or transmitter is located proximate to the grave site.

55. (Previously presented) The system of claim 53, wherein the grave site comprises a coffin, wherein the at least one of the computer readable medium or transmitter is located in the coffin.

56. (Previously presented) The system of claim 53, wherein the grave site comprises a head stone, wherein the at least one of the computer readable medium or transmitter is located in the head stone.

57. (Previously presented) The system of claim 51, wherein the computer readable medium further includes biographical information relating to a plurality of deceased persons.

58. (Previously presented) The system of claim 51, wherein the device comprises a portable electronic device.

59. (Canceled)

60. (Previously presented) The system of claim 51, wherein the transmitter is operable to transmit the at least a portion of the requested biographical information relating to the deceased person to the device wirelessly.

61. (Currently amended) A method for presenting information relating to a deceased person, the method comprising:

- a) receiving biographical information relating to a deceased person, wherein the deceased person is associated with a cemetery;
- b) storing the biographical information relating to the deceased person in a computer readable medium;
- c) receiving a request for at least a portion of the biographical information relating to the deceased person, wherein the request is received from a user located within the cemetery, wherein the request is made by the user through a device operable to transmit the request from the user, wherein the device is located within the cemetery, wherein at least a portion of the request is received by a receiver in communication with ~~the~~ a processor, wherein the receiver is operable to receive requests for biographical information relating to a plurality of deceased persons associated with the cemetery; ~~and~~
- d) transmitting at least a portion of the requested biographical information relating to the deceased person, wherein the transmitted biographical information relating to the deceased person is transmitted to the device located within the cemetery, the device being further operable to present at least a portion of the transmitted biographical information to the user located within the cemetery, wherein at least a portion of the act of

transmitting is performed by a transmitter, wherein the transmitter is operable to transmit biographical information relating to a plurality of deceased persons associated with the cemetery; and

e) providing a kiosk located within the cemetery, wherein the kiosk comprises one or more of the computer readable medium, the receiver, or the transmitter.

62. (Previously presented) The method of claim 60, wherein the transmitter is located within the cemetery.

63. (Previously presented) The method of claim 60, wherein the device is electronic and portable.

64. (Previously presented) The method of claim 60, wherein the computer readable medium comprises data representing biographical information relating to a plurality of deceased persons.

65. (New) The method of claim 39, wherein at least a portion of the life pack is provided to the person associated with the deceased person electronically.

66. (New) The method of claim 39, wherein at least a portion of the responses to the requests for particular types of biographical information are received electronically.

67. (New) The method of claim 39, further comprising permitting the person associated with the deceased person to select a particular style from a plurality of styles, wherein the styles correspond to visual formats for presentation of the biographical information during the act of transmitting at least a portion of the requested biographical information.
